SUMMARY

I'm a detail-oriented junior software developer who loves tackling challenging problems and has a strong coding foundation. I adhere to industry-standard architecture and best coding practices, thriving in collaborative environments and consistently delivering results under pressure. Strong collaborator with a track record of delivering on-time and on-budget projects and initiatives.

EDUCATION

- **SSN College Of Engineering** Chennai
BE in Computer Science and Engineering; GPA: 8.38 Aug 2019 - Jun 2023

SKILLS & COMPETENCIES

- **Languages:** : C, Java, Python, Bash Script, SQL, MongoDB, HTML, CSS, Javascript
- **Technologies:** : Spring Boot, Node.js, Django, Flask, React.js, Docker, Jenkins, Rest API, GraphQL
- **Competencies:** : Security & Authentication Protocols, Agile Methodologies & Cross-Team Collaboration, Continuous Integration & Deployment Processes, Troubleshooting & Debugging

WORK EXPERIENCE

- **Associate Engineer at Crayon Data** Hybrid
Junior Backend Developer Aug 2023 - Present
 - Developed GraphQL APIs for a configuration-driven mobile application using Hasura, enabling efficient and flexible data retrieval.
 - Built an automated email notification service in Spring Boot with retry mechanisms for improved reliability and fault tolerance.
 - Contributed to scalable backend services for a digital banking platform, including security enhancements through code obfuscation.
 - Optimized database performance through schema normalization, indexing strategies, and PL/SQL-based business logic implementation.
 - Participated in design discussions and code reviews, maintaining high standards of code quality and engineering practices.
- **Inoasis Technologies — Software Developer Intern** Remote
Intern Aug 2021 - Feb 2022
 - Implemented Django-based REST APIs and integrated Twilio Video APIs for teleconsultation and appointment management features in healthcare applications.

PROJECTS

Personal Expense Tracker — Expense tracking app built with Flask and PostgreSQL featuring a category-based dashboard, monthly breakdowns, and CI/CD on Vercel. 2022

Form Bot — Built a form automation platform leveraging Python, Telegram Bot API, and PostgreSQL for creating forms and managing user responses through Telegram. 2021
